INTRODUCTION

OSOS Energy is an Iraqi company based in Basra, Iraq, specializing in oil and gas logistics and contracting services. With a strategic location in the heart of oil & gas industry in the region, known as the largest reserve and producer of oil to provide the needs of the energy sector. OSOS Energy offers a comprehensive range of services, including transportation, storage, and distribution of oil and gas products, as well as providing contracting solutions for infrastructure development and maintenance projects. With a dedicated team of professionals and a commitment to operational excellence, OSOS Energy aims to support the growth and success of Iraq's oil and gas industry.

WHY TO CHOOSE US ?

Choose OSOS Energy for unrivaled expertise in oil and gas logistics and contracting, backed by our strategic location in Basra, Iraq. Our comprehensive services, experienced team, and commitment to operational excellence ensure seamless solutions for the growth and success of your projects in the dynamic energy sector.

ABOUT US

WHAT IS OSOS ENERGY COMPANY:

OSOS Energy was formed as a result of a long history of expertise buildup in engineering and industrial sectors since 1935. Along with its USA based sister company; General Mechanical; they ensure successful implementation of regional projects. They also assist in developing and rehabilitating local and regional industrial and production companies in various fields.

HISTORICAL BACKGROUND

1935

With the prosperity of the Iraqi market in the early days of oil discovery, investors and Iraqi industrialists have realized the need for mechanical equipment. Al-Mahara PIC. the ancestor of OSOS with its first generation, provided the market with such equipment mainly through imports from renowned international suppliers.

1968

A factory was established in Baghdad to address market needs of mechanical equipment and parts. The factory is located in two buildings that are fully equipped with state of the art machinery to fulfill the majority of customer needs. The Factory includes the following:

- Five Lathe machines.
- Two milling machines
- Engraving machine
- Two machines for grinding surfaces
- Drilling machine
- Welding machines
- Vertical and horizontal reciprocating and continuous saw machine
- Wire cutting machine with CNC.
- Three different thermal furnaces
- Four drilling machines
- Scraping
- Five pressing machines of different sizes and pressures (ranging from 20 tons to 100 tons)
- Shears for metal sheets measuring 3 meters.
- In addition to templates, tools, and several stores.

SINCE 1935 AND STILL GROWING

1984

With the prosperity of the Iraqi market in the early days of oil discovery, investors and Iraqi industrialists have realized the need for mechanical equipment. Al-Mahara PIC. the ancestor of OSOS with its first generation, provided the market with such equipment mainly through imports from renowned international suppliers.

2017

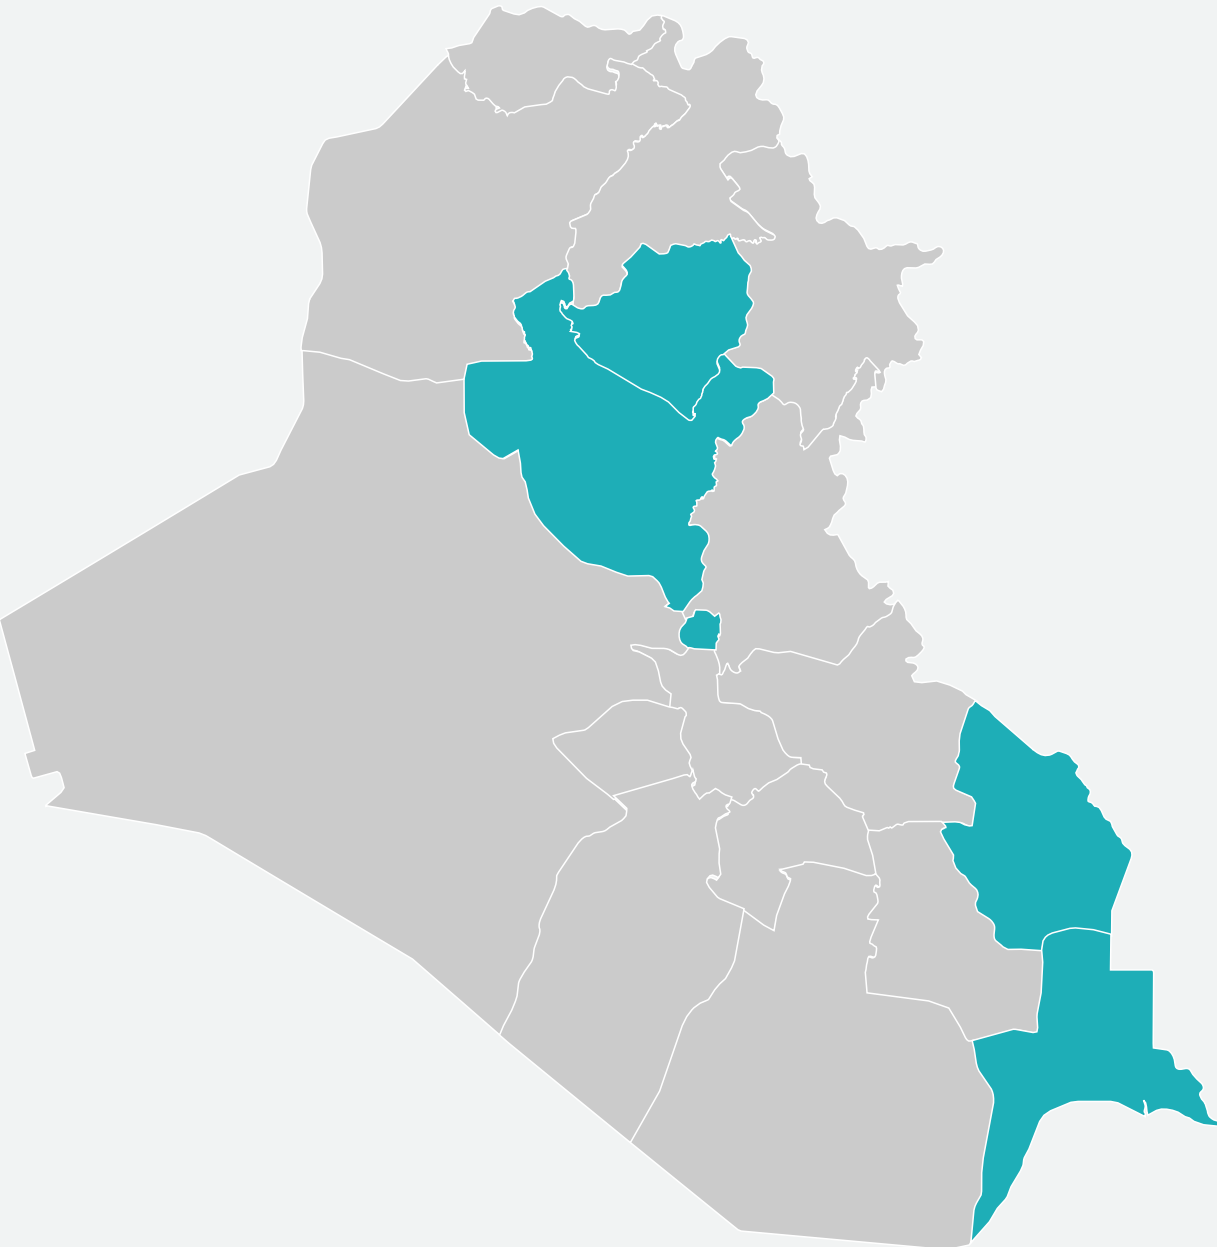

With the abundance of resources serving the Iraqi market, the third generation realized the need to reorganize the company to reassure its continuity in this highly competitive environment. Taym Al Furat is currently heavily involved in providing the Iraqi Oil & Gas markets with their needs. Since 2010 some business deals were the reason to form Taym Al Furat that contracted to supply pipes for oil companies in addition to other vital products. They were also contracted to work in the field of petroleum products import-export through various regional and international sea ports.

TODAY

OSOS Energy today offers fully integrated services enabling contractors from both Public and Private sectors to accomplish successful delivery of their projects. These services are carried out with use of the latest technologies and highest international standards. They are also done with considerations of environmental protection as well as high customer integrity, manpower enablement and motivation.

OUR MISSION

In addition, it looks forward to developing the Iraqi industry by adopting a pioneering approach based on three dimensions: history, science, and man. The company seeks to preserve its legacy industrial heritage, to comply with the ever-changing optimal international standards, and to embrace and empower Iraqi youth to create success in every field.

OUR VISION

The company aims to provide supplies, oil equipment and mechanical energy equipment, find alternatives and advanced technical solutions, and keep pace with what the world has achieved in terms of energy

OUR VALUES

Osos Energy Company is a firm driven by strong values. With a commitment to excellence, they strive to provide reliable and sustainable energy solutions. Their focus on innovation ensures they stay at the forefront of the industry, continuously exploring new technologies and strategies. Osos Energy values integrity and maintains transparent communication with clients, fostering trust and long-term partnerships.

DEDICATION

QUALITY

TRUST

At OSOS Energy, we are unwavering in our commitment to our core values. Integrity, reliability, and safety are at the forefront of everything we do. We prioritize transparency, ethical practices, and maintaining a safe work environment. Trust us to deliver on our promises and uphold our values.

HEALTH, SAFETY AND ENVIRONMENT

WHY WE VALUE HSE?

OSOS Energy places the utmost importance on Health, Safety, and Environment (HSE) as a core aspect of our operations. Our HSE policy is designed to ensure the well-being of our employees, contractors, and the communities in which we operate. We are committed to complying with all relevant laws and regulations, promoting a proactive safety

culture, and minimizing our environmental impact. Through ongoing training, risk assessments, and regular audits, we strive for continuous improvement in HSE performance. Our goal is to create a safe and sustainable work environment while fostering responsible practices in the oil and gas industry.

QUALITY MANAGEMENT

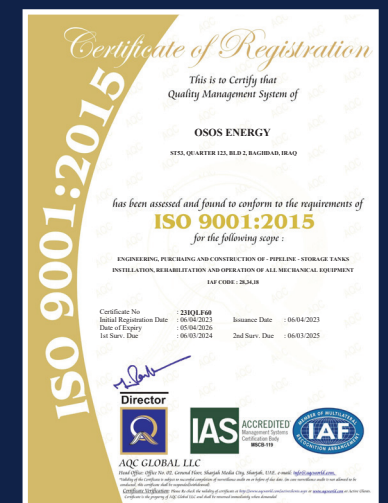

OSOS Energy maintains a robust Quality Management System (QMS) to ensure the delivery of superior products and services to our clients. Our QMS is based on internationally recognized standards and encompasses all aspects of our operations, from procurement to project execution. We consistently strive for excellence, regularly monitoring and improving our processes to meet and exceed customer expectations.

ISO 45001

ISO 14001

ISO 9001

In addition to the Iraqi Chamber of Commerce certification, OSOS Energy's partnership with its clients is strengthened by its proven track record of success. The company's unique expertise and longstanding scientific capabilities instill confidence and competence in its customers. With a solid foundation in its field, OSOS Energy has become indisputably the first choice for its clients over the years.

HOW WE DO IT

WHAT DO YOU GET FROM DEALING WITH OUR COMPANY?

1. Our wide network of strong relationships built on mutual trust extends to various governmental ministries and public companies, including the Ministry of Transportation, Ministry of Electricity, and Ministry of Oil.
2. In Europe and America, our company boasts a rich portfolio of reputable commercial agencies with leading international companies.
3. Our company possesses and excels in technology adaptation, surpassing local capabilities, to meet the needs of operating companies in Iraq.
4. The company's unique specialization at the intersection of scientific fields, specifically manufacturing, oil, and energy.
5. We offer market-leading integrated services exclusively focused on meeting the unique needs of the Iraqi market.

OUR TEAM AND EQUIPMENT

OUR TEAM:

Our team at OSOS Energy is composed of highly skilled professionals who are passionate about their work. With diverse expertise and years of experience in the oil and gas industry, we collaborate seamlessly to deliver exceptional results. Our team's commitment and dedication ensure the success of every project we undertake.

OUR EQUIPMENT:

OSOS Energy is equipped with state-of-the-art equipment that is well-maintained and technologically advanced. Our comprehensive range of equipment, including transportation, storage, and specialized machinery, ensures efficiency and reliability in executing projects. We prioritize quality and reliability to meet the demanding requirements of the oil and gas industry.

**SINCE 1935
AND STILL GROWING**

OUR SERVICES

01

PROVIDING MATERIALS

We provide the highest quality, optimal, and most suitable industrial materials and equipment to meet the required needs.

02

ENGINEERING SERVICES

We provide engineering, procurement, and construction services, including the design, execution, and installation of tanks and pipelines. This also includes large generators, oil valves, and pumps.

03

POST-CONSTRUCTION

We provide post-construction services, which means we ensure the smooth operation of the project, guaranteeing the proper functioning of the company involved.

04

FACTORY DEVELOPMENT

We provide the highest quality, optimal, and most suitable industrial materials and equipment to meet the required needs.

05

TRAINING SERVICES

Training and development refer to the process of enhancing and empowering the capabilities of individuals or organizations to facilitate their achievement of goals and ensure their success.

OUR PROJECTS

Project: Oil Jetty Development and Operation Project.
Location: Khor Al Zubair Port.

In collaboration with Tyam Al-Furat Company as a subcontractor, OSOS Energy Company is undertaking the construction and development of pipelines with lengths of up to 4,000 meters, along with the construction of a 10,000 cubic meter capacity storage tanks connected to a dedicated pumping station. This berth has the complete construction of the jetty, provision of all necessary accessories, electrical and mechanical installations, loading equipment, and a dedicated power station. In addition to engineering, procurement, and construction services, OSOS Energy Company, in partnership with Tyam Al-Furat Company, will operate the jetty for a period of 12 years.

Project: Al Ahdab Oil Field preparing.
Location: Al Ahdab Oil Field

The development of the Al-Ahdab Oil Field involved the installation of pipelines, accessories, and oil valves with various pressures and measurements. The company conducted engineering designs for water injection systems, distribution networks, and implemented work procedures in accordance with standards.

Project: Natural gas pipeline installment.
Location: Al-Rasheed gas station.

OSOS Energy Company`s team has successfully implemented an advanced and sustainable solution for the Rashid Gas Station, ensuring the efficient and reliable transportation of natural gas. The company has delevered the station with 12-inch diameter pipelines for the natural gas transportation, along with their corresponding accessories and manual and automatic control valves that do not rely on electrical power. These components have been thoroughly inspected and verified to meet the required standards for a successful project. OSOS Energy Company has taken on the responsibility of monitoring the project's progress after its execution, ensuring its continued success over a period of several years.

Project: Weatherford international fuel tanks installment.
Location: Rumaila oilfield.

Due to its knowledge and the efficiency of its engineers, OSOS Energy Company has gained the trust of Wetherford International in Basra. As a result, OSOS Energy Company manufactured nine fuel tanks for the Rumeila field, each with a capacity of $100M^3$, a length of 12M, a thickness of 10mm, and a diameter of 3M. The tanks were double-lined and coated with epoxy.

Project: Upgrading gas turbine unit.
Location: Kirkuk/Taza power plant

Based on its expertise and engineering capabilities, OSOS Energy Company has been chosen by GE power to undertake the project of upgrading the gas power station in Kirkuk. This project involves the modernization of turbine units for the international company, Royal Khyber. OSOS Energy Company will provide engineering and industrial support to ensure the successful execution of the project and leverage its expertise in the field.

Project: Wagon trailer modification.
Location: Iraqi General Company for Railways.

In cooperation with the Iraqi General Company for Railways and Finnish Company «T-Machines,» OSOS Energy Company has successfully carried out a Wagon trailer modification project. The project involved modifying cargo wagons, with their payload capacity 56 tons and their length of 24m, transforming them into specialized trucks capable of transporting railway equipment such as track maintenance machinery.

Project: Repair and Modification Project for Track Maintenance Vehicle Axles.

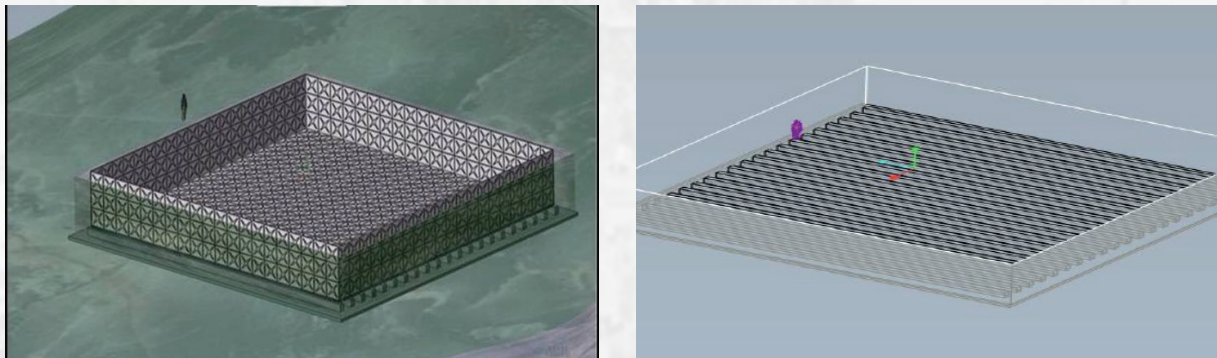

OSOS Energy Company has successfully executed this project by the integration of its services, including leadership, design, and manufacturing. Additionally, the combined efforts of its engineers and workers have contributed to providing sustainable and long-lasting solutions.

Project: Ballistic Detection System Project.
Location: Baghdad police department.

OSOS Energy Company has developed a specialized ballistic detection system to serve the public sector. Leveraging the capabilities of OSOS energy, the system is capable of accurately detecting bullets according to the requirements of the Baghdad Police College. Following the successful manufacturing and demonstration of the initial system, which exhibited precise and trustworthy performance, OSOS Energy Company has manufactured an additional 11 systems to meet the forensic requirements of various provinces in Iraq.

Project: Water tanks design for Baghdad municipalities.
Location: Baghdad.

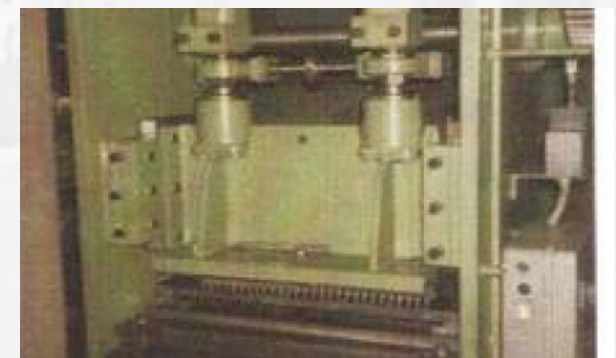

Project: Jetty fenders manufacturing & installation
Location: Basra / Umm Qasir.

FACTORIES DEVELOPMENT

In the field of metal work, OSOS Energy Company specializes in the development of various manufacturing processes, including:

- Metal Forming and fabrication processes: Shearing, Stamping, Bending, Rolling and welding.
- Machining: CNC machines for turning, drilling, boring, milling, and heat treatment of metals.
- Casting and Forging: Melting furnaces, heat treatment furnaces, and forging presses.
